

Collect For Future

Our Goals:

Our Aim: We have developed a project to raise awareness by helping achieve the UN Global Goals and spread a socially conscious global movement.

In our poster; We tried to draw attention to plastic waste and nature protection. Also, with the male-female marks on the covers; we pointed out that gender equality and that we developed our project for girls

Gender Equality

Gender bias is undermining our social fabric and devalues all of us. It is not just a human rights issue; it is a tremendous waste of the world's human potential. By denying women equal rights, we deny half the population a chance to live life at its fullest. Political, economic and social equality for women will benefit all the world's citizens. Together we can eradicate prejudice and work for equal rights and respect for all.

Unfortunately, our country is 130 th among 153 countries according to the Global Gender Inequality Report 2019. 136 th of the participation and equal opportunities in the field of business life Turkey, 106. the field of education, in health 67. According to the report, it takes 108 years for women to have equal rights with men. Our first goal is the equal participation of girls. For this reason, we wanted to make a study with the ÇEK (Çağdaş Eğitim Kooperatifi)- "Kır Çiçekleri" in our city. "Kır Çiçekleri "program support girls who live in mountain villages but do not have the chance to education due to financial difficulties. We also wanted to support the "Kır Çiçekleri " this our project

Climate Action

Climate change is a real and undeniable threat to our entire civilization. The effects are already visible and will be catastrophic unless we act now. Through education, innovation and adherence to our climate commitments, we can make the necessary changes to protect the planet. These changes also provide huge opportunities to modernize our infrastructure which will create new jobs and promote greater prosperity across the globe. The excessive use of plastic in our country and in the world disturbs us. We are aware that plastics do not disappear easily. In fact, we think that the use of plastic should be banned, but for now; We thought that the best solution in our project would be an approved recycling company.

We collected blue plastic cover for this project. Agreement with a recycling waste firm within the scope of social responsibility project; we donated the price of plastic caps for Kır Çiçekleri. We also prevent the damage caused by plastic to the environment. every 1 ton plastic cover cost is 2.000 TL and every 5 tons equal is 1 Girl education cost.

Our Journey: * Firstly we created our team ; We made announcements in our school. Our first activity; By participating in the 6th national race in our city, this year; to explain our project and to collect the caps of the water bottles drunk during the run.

*Then we visited each class in our school and explained our project. In addition, we put our boxes and banners for collecting covers by reaching places where we can collect plastic covers, such as every factory and restaurant we can reach.

*We had meetings with KALDER, Quality Association in our city and our stakeholder ÇEK.

*We took part in the national press by explaining our project.

*By participating in the project writing training of the "Governorate- European Union Projects Unit"; we had the opportunity to improve ourselves and took private course to write projects. We also supported other students who want to learn how to write a project here. We announced this project writing seminar at school. So they can write their own projects

*To reduce the use of plastic, we made a custom steel thermos and introduced this. We also collected donations by selling kermes made to primary and secondary school students by selling these thermos and the products made by the " Kır Çiçekleri"

Our Impact:

With the activities we wrote above, in 40 different locations; we had the chance to reach thousands of people and explain our project and most importantly, the global goals. We donated 2.000 TL, which is the price of 859.000 caps we collected to the Kır Çiçekleri. In addition, we donated 1.500 TL we earned from the sale of kermes in our school. With the awareness studies we do; We decided to organize the "The Global Goals Summit" summit in our school and to do this every year and to explain the principle every year. However, due to Corona virus; we had to cancel the summit this year.
