of participants said they felt part of the global movement

95%

of participants said they would attend the festival again

98%

of participants said they would recommend the festival to a friend

“

The experience was wonderful. The speakers were inspiring and I hope I get to take an initiative like they did to create a sustainable and safe future for us. Even though we were communicating through screens, I felt part of a global movement and empowered to make a change.

“

It was an experience that had brought a lot of insight into ones life, especially as a teacher, since we can bring about change in the youth. I would not hesitate to attend a GSL conference again since it was very enriching.

I had a fantastic time at the GSL Festival @Home. I feel so much inspired and empowered by the amazing sessions I have attended. As it was my first time being a part/participant of GSL, I was mind-blown by how so many people have contributed to world crises in such unique ways. I truly had an amazing experience.

My experience during this GSL Festival made me think globally and to change our world or environment through social steps and private growth. This programme as also made me to develop people who will become leaders with the passion, values and skills to serve and make a positive difference to the lives of others.
