

'We can't survive without nature; but nature can survive without us!'

CLIMATE TRACKERS- "MISSION: GREEN EARTH"

About Us: The Team "Climate Trackers" is a group of Six Grade 9 students from Indian Education School located in the State of Kuwait, who made it to the GSL final round and successfully bagged the prestigious "Pivot Award" with the theme "Nature Clean Drive" in 2020. The Covid-19 did not stop them from achieving their target of spreading awareness through social media like YouTube, Instagram, Website and Zoom platform. A Glimpse of Project: The previous year Project initiative has been continued under a new theme with renewed passion and focus on the mission in 2020-21 too.

Spreading awareness about Climate Change is the team's main aim

Cleaning Beach sides to save marine life

The Climate Trackers spread awareness to reduce land pollution because it will affect terrestrial life in many ways

OUR AIM: 'SMALL CHANGES HAVE A HUGE IMPACT'

This team's main aim of this year was to "spread awareness to people around the globe" to save environment and make a better place for our future generations. In order, to achieve our goals we were able to conduct various activities in midst of Covid-19 both online and offline.

Our team:

Responsibilities carried out successfully

Aaron Anil Thomas	Prepared of YouTube videos and posters, wrote and edited articles in newspaper, participated in beach clean-up program and delivered talk in the webinar.
Andriel Remi	Created Posters, wrote articles, created, and presented video in the webinar.
Joseph Joe	Created online servers to spread awareness, actively participated in beach clean-up program and delivered talk in the webinar
Kevin Prince	Prepared YouTube videos, posters, actively participated in beach clean-up and actively participated with technical assistance in webinar.
Kiran Varghese Cherian	Created posters, actively participated in beach clean-up program.
Mohammed Mujtaba Ali	Created posters, contributed greatly for newsletters, uploaded photos and videos in Instagram and actively participated in Beach Clean-up Program & webinar.

Our learning experience: The team learnt how to use social media platforms efficiently to reach out the public, working towards a mission even during this Covid-19 pandemic. Improving in the creativity skills, teamwork, and coordination we could come up with new and interesting means to spread awareness. Public speaking and interactive skills tremendously increased along with confidence and self-esteem after every task we executed successfully and meaningfully. Also, we got better & more efficient in the use of technology for making YouTube videos, editing, posters & presentations. One of the main experiences was learning to collect & organise data for making better decisions and steps. All the team members increased their knowledge on topic with extensive and intense research.

OUR ACHIEVEMENTS: 2020-2021

E-Newspaper

Since May 2020, the team started a E-newspaper called 'The Climate Trackers Newspaper' and the E-newspaper has been posted every week and circulated across Social Media with wide reachability. The highlights of the newspaper are the focused content on environmental issues and latest climatic news. A special column is allotted for the Animal of the week and Plant of the week with which facts and details about various endangered animals and plants are brought to the readers.

Posters

Team Climate Trackers regularly uploaded Posters on social media on different environment related issues.

Beach clean-up

As the Covid-19 cases simmered down in our area, the team made a quick decision to conduct a beach clean-up program on January 2, 2021.

One of most polluted beaches in Kuwait was selected and the team members cleaned up the entire seaside of filled with plastic, paper, packets, etc. 7 huge bags of trash was removed that day. Additionally, the team spent time to converse with the public about keeping our environment clean with a collective effort. Thus, they were able to clean up the polluted beach of Kuwait and at the same time spread awareness. Overall, this activity had deep and responsible impact on the people at the beach. Being the first of its kind, the news was circulated all over Social Media and many other Beach Clean-ups were conducted by other groups after being influenced by their movement from

Webinar

An hour's time of informative webinar was yet another step taken by the Climate Trackers to educate the young minds with information and spread awareness. The same was held on the Earth Day of 2021. The topic of this webinar was the same as WHO's topic - 'Restore Our earth'. The main presentation was led by to skilled speakers of the team. The meeting even had an interactive question session which made the session even more effective and useful. Towards the end of the webinar, an informative video about interesting details about Earth Day made and played to the audience by yet another member. The team realised that this webinar was a grand success as they were able to ignite and inspire the minds of the young students on April 22, 2021.
