

# THE UNITED WE STAND PROJECT

## ABOUT US:

We are The United We Stand Project. Our aim is to raise awareness on sustainable living, by promoting and sharing sustainable practices and environment conservation. In the Philippines, environmental issues are neglected and take a back seat, as other issues take priority, which is the reason why we chose our SDGs. We hope to educate people on the efficient use of our natural resources and why it is important to conserve them. One of the ways we hope to achieve our goals is through teamwork, we have collaborated with various organizations and people, to gain a deeper understanding of sustainability.

## HIGHLIGHTS:

- Collaborated with and had panels with Kai Farms, Auroville, Project Food Tree and The Eco-Friendly Girl
- Exchanged promotions with We together, Hotdogs, Toiletri, Manta From The Wave, GSL Little Heroes, Gender Equality, Self-Care Sport, Doctor Cookie Foundation, Recycle The World, Geneco, GSL Connect, Dreamcatchers, We Med, Yafu Official, The Elick Trick Catons, Error 429, Future Stem Leaders, No Emissions
- Collaborated with local businesses like Pure Essential Ph, Squeaky clean kids, Metal Manila, Eco bar ph, Ecozips, Kaifarms, Talala, Ecolohika, Humble market, Phoenixfit eco products
- Received a shoutout from GSL on their Instagram and their newsletter
- Held a workshop centred around sustainability with students at our school, SSM
- Posted several series dedicated to different aspects of sustainability on our Instagram

## ACHIEVEMENTS:

- Collaborated with organizations, small businesses, people who practice a sustainable lifestyle, and other GSL Teams
- Received a shoutout by multiple local organizations
- Each member was able to connect and fully understand sustainability
- Reached follower goals
- Featured on 'Feel Good Fridays' and the GSL Instagram account as a Social Star of the Week

## SDGs:

"In the process of the United We Stand Project, I have seen that through unity we can achieve a better lifestyle not just for ourselves but for our everyone. Through steady teamwork and combined efforts, people can progress farther than we can imagine."

- Savannah, Grade 7 Student

"In the beginning, we were a tiny sapling merely embedded in the ground. Our experiences are like sunlight, water, and air - each one adding up and nourishing our growth. Today, we stand tall as a big tree - one that has withstood the darkest and rainiest of days alongside the brightest and sunniest ones too. GSL has made us learn values of teamwork and dedication."

- Shirin Saundh, Team Leader

I feel so privileged to have been given the chance to guide these five young student-leaders. Pandemic did not hinder them from coming up with the "United We Stand" Project. They may not change the entire world right now - but surely, they have conquered their own fears and discovered their passion for social involvement. Thank you GSL for giving these young individuals a platform to consider social action!

- Anthony Agujero, GSL Adviser

# THE UNITED WE STAND PROJECT

## OUTCOME:

Throughout our project, we have succeeded in doing many things. We have achieved our goals, inspired others, and helped them as well. We have had three successful panels with individuals, students and organisations alike. Thanks to these experiences, all of us can say we fully understand the topic of sustainability and what it is all about.

However, that doesn't mean we haven't had our fair share of struggles. Because of the pandemic, we were not able to fulfil some activities we planned to do because of the strict quarantine guidelines. However, because of this, we were able to adapt. Instead, we shifted to doing all of our activities online, like holding meetings and panels on platforms like Google Meet. Our series, "United Discussions" is a good example of this, we invite guest speakers to discuss different matters revolving around sustainability and leading a greener life. So far, we have had 3 episodes, 2 of which feature speakers that live a sustainable lifestyle.

Through these experiences, we were all able to learn something. We have learned how to lead a sustainable lifestyle, the benefits to it and the impact it makes. We also picked up quite a few skills, like communication, coordination, managing, efficiency, how to work well with others, and many more.

## IMPACT:

235+ followers

350+ people involved

4500+ likes

780+ hours spent

200 bottles recycled

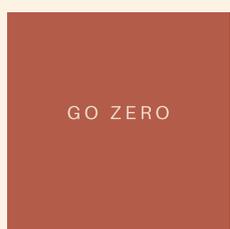

680+ pieces of plastic recycled

14 businesses helped

190+ people helped

# A SMALL ACTION CAN MAKE A BIG IMPACT.
