

CIS Team Inclusive

About Us

We are Team Inclusive from Cambridge International School Dubai, UAE. Originating from the Country of the future, our prime goal focuses on striving to provide Quality Education to children in various aspects, including entrepreneurship, innovation, literature and UN SDGs. We hope to equip GEN-Zs with skills for the future by providing them with exponential possibilities/opportunities; by doing so, we are already radicalizing change to create a better, brighter, innovative, inclusive and equity-focused future. From tutoring conversational English to underprivileged students in our Native land worldwide.

Learn On Call

- Learn on call, teaching conversational English to underprivileged students in India. It was one of the most exhilarating opportunities, revolutionising the potential for education. Sessions were conducted over zoom to connect minds and support our students to create a better future.
- The sessions collaborated with an infamous NGO aimed at SDG goal 4 (Quality Education) in India- Sampoonashiksha; they helped us find the students who required support. As a result, we were successfully able to inspire 60+ students for the past two years with this initiative, and we intend to continue it for the 3rd consecutive year.
- We were able to embed our concept over to a global audience at the ICAN Global Summit, held at the EXPO 2020 India Pavilion, wherein it was presented to over six different countries who travelled across the globe to view the young innovators of UAE. We were truly able to showcase our initiative whilst meeting people who were similarly passionate about similarly outstanding projects

Metaverse Challenge

CIS Innovators have to create revolutionising solutions to tackle problems in Metaverse or use Metaverse to find sustainable solutions to solve challenges in the real-world related to the UN SDG goals.

CIS Innovation Day

Innovation is the process of bringing an idea to life. CIS gives an opportunity to all its students to showcase their inventions on different platforms. One of which is the Global Innovation Challenge. It expects students to develop unique solutions to resolve the 17 SDG goals. To felicitate these students who have the great minds to bring a change in this world and encourage students who are afraid to step up and share their solutions.

SPRINT Inclusion Challenge

CIS Innovators were challenged to create solution to make every day living (such as restaurants, supermarkets, metros) more inclusive for those who are amongst people of determination. We had a guest speaker, Mr. Arindum Banerjee (Renowned Published Author and A Faculty Member at SP Jain College) conduct a SPRINT challenge session for more than 50 CIS future makers.

Stationery Drive

We conducted a stationery drive to support the education of underprivileged children. All year groups have supported this initiative by contributing their half. We have had an overwhelmingly successful drive and are excitedly looking forward to supporting the education of underprivileged children

Stationery Drive

To support the education of underprivileged children

22nd - 27th April
Years 7 - 13

Help us make a difference by donating!

new items only:
Pencil case/water bottle/
backpack/sharpener/ruler/
notebooks/drawing books/
calculators/colour pencils/
crayon/scissors

Drop off location: Lobby 7-10

IACAO permit number: 4600

CIS DYSF

DYSF programs are uniquely designed to complement the objectives of Expo 2020, Global Sustainable Development Goals and Mohammed bin Rashid Al Maktoum's vision 2021. Under our program, entrepreneurs and teams will get the opportunity to build traction and funding by establishing a critical support network of local startup experts invested in their success and providing a structured and challenging business-building process. CIS DYSF funded three startups on a mission to solve the climate crisis and food wastage and improve literacy.
