QUALITY
EDUCATION

THE SHADOW EDUCATORS

Out of the world's 787 million children of primary school age 8% do not go to school. That's 58.4 million children!

So we team "Shadow Educators" have made it our aim to strive to provide and aid quality education to the children of our community. And to help children to quench their thirst for knowledge the way we can.

The team in action at the "udugama school"

1) PROJECT: LEND A HAND

This part of the project is in fact a continuation of a project done by team "Lend A Hand" from the year 2019. In where we support a rural school here in Sri Lanka. The whole process of this project was truly enjoyed and we learned alot.

2)PROJECT: EQUAL EDUCATION

WE BELIEVE EVERY STUDENT IN THE WORLD DESERVES EDUCATION EVEN, "DIFFERENTLY ABLED CHILDREN. SO WE MADE E-POSTERS TO RAISE AWARENESS REGARDING THIS MATTER.

4)Skills Gained

1. Efficient communication
2. Leadership
3. Collaboration
4. Time Management
5. Team work

5)Funding And support received

Thanks to our previous year projects, we had sufficient funds through out the project. We received alot of support from previous GSL students and collaborated with other GSL teams.The previvos GSL team members also donated a computer for us to donate to the school .

6)Impacts and outcomes

through our first project we impacted more than 111 students in the school we helped, and many other people during the second project through social media. And at the end we succeeded to help that school and raise awariness regarding project 2. Overall i am proud to say that is project was very successful and the journey and effort that took to achieve it is priceless.

3)Knowledge gained, experiences and highlights

i)The project "Lend A Hand " was truly a very impactful project for us, we received a rare oppurtunity to interact with the children understand their life style and communicate. We learned alot about the surroundings of that school and very intresting facts from the principle.We even got a chance to taste traditional food from the principle

ii) And during the project"Equal Education For All" We learned alot about differently abled children and their life.
