Our Goals:

- Spread awareness and educate people about ocean pollution, and plastic use. In Kuwait, single-use plastic is at an all time high because of the lack of awareness amongst the general public, as well as no incentives to deter people from using them.
- Raise money for #TeamSeas. #TeamSeas is an organization whose mission is to remove 1 pound of garbage from the ocean, for every dollar donated. Our goal was to raise money for them so we can directly remove trash from the ocean through #TeamSeas, whilst encouraging others to do the same.
- Encourage and engage our local community in recycling activities, as not enough people are invested in recycling in Kuwait.

Collaborating with our school's Student Council:

We organized several events in our school that both made students proactive and engaged in recycling, as well as events that raise money for #TeamSeas. We managed to collect and recycle 43kgs of plastic from the students, as well as collecting 110KWD, which is the equivalent of \$358, which means our we had resulted in our school community indirectly removing 358lbs of trash from the ocean!

Collaborating with #TeamSeas:

Beach Clean-up:

We bought everyday equipment to clean up the sand from plastics. Microplastics are small pieces of plastic and although these plastics didn't contribute to much weight, they are equally as harmful, because aquatic life and birds can eat them.
