

SELECT AND INT-ELECT

Project Aim:

Our aim is to make our country better with the right leaders. We want voters to know that voting wisely can give the Philippines a brighter future. Our campaign was pictured to educate the people of Lucena City to select and elect worthy leaders in the upcoming election. The Philippines has been going through drawbacks especially with the pandemic going on.

We need leaders that will be able to lead our country that is why we want to achieve what we are aiming for. We find a solution to this problem through our cause and it makes us so happy that people are actually learning and listening to us. It is so fulfilling because even though we are children, we are able to inspire, influence and educate others about voter education. Hopefully someday we will reach our dreams of a better Philippines.

Highlights from our Experiences so far

Our partners in our campaign are the Sangguniang Kabataan from different barangays who we are very grateful for since they were a big help in our campaign. We also conducted an event which is a Spoken Word Poetry contests that will allow the fellow contestants to share their ideas and insights in order to voice out their opinions through joining this event. We also offer our gratitude to the Lawyer who was our guest speaker in the webinar with the theme "Select and Int-Elect, Voters Education: Let the Voice of the Youths be Heard" which our team and our Grade 8 batch mates prepared and worked really hard for.

For the funds and in-kind donations, our team and the ISBB Grade 8 students sold pins related to our campaign during our school's foundation anniversary. We also shared money to support an event that we hosted. The Event is a spoken word poetry contest that will allow other people to hear the voices of the youth. With the money that we shared, we plan to give it to the winners of the contest.

The venue for our last event, which is the webinar was in zoom. The zoom account that was used to host our event was provided by our school whom we are very grateful for. Lastly, one of our grade 8 batchmates made a poster to promote our webinar. The poster was made by Eisha Espinosa.

SELECT AND INT-ELECT

The outcomes and impacts of the project:

We want the outcome and impact of our project to be positive and we are doing our best to achieve it. Select and intellect is our campaign. Our aim is to educate people in our country to vote wisely. We want to see voters and future voters to be educated for our country to have a better future for the upcoming generations. We have to make a great impact on people's minds on who to vote, how to vote and think it through. Voting a leader for your own country is not a joke and we want people to realize that. Hoping our hard work to get a positive outcome and impact on the people we educated. Currently the Philippines is still struggling with the virus and our country will need a leader that will end it properly. Not only do we want our voters to be educated but we also want to give our whole country a bright future and be able to beat the pandemic. Our outcome and impact of our project would be a huge help for our country and we are working hard to achieve it.

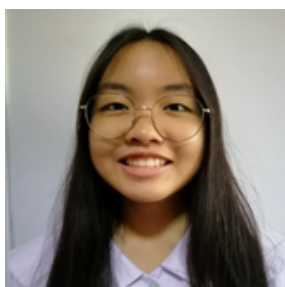

Precious Althea C. Baccay

This project taught me a lot of things. The project also helped my personal development. It aids in a variety of ways that can be applied in real-life situations. I also discovered the significance of communication. We are able to communicate and share ideas through online platforms, allowing us to produce a result that meets our objectives for this project.

Benice Andrea M. Sales

learned a lot of patience and learned the true value of teamwork. This project we are doing needs a lot of patience to finish a task and you need your groupmate's cooperation so teamwork is really needed. Not only that but also I learned how to communicate properly with my groupmates.

Mary Liz Haylenn Q. Licardo

Throughout the project I learned the value of teamwork. Because we don't really get to see each other face to face so we usually work individually. When we need to communicate with each other, we only do it through a short zoom call but now, we are able to get the work done together because throughout the project we became closer to each other, we get to bond and work together.

Jozef Francko P. Paraiso

Working hard and working as a team taught me responsibility. Hard Work is needed to make our project successful. Even though we do not know each other very well, in this team we can talk to each other and bond while doing activities. This will enable us to get close to each other. To make things easier, it is helpful to work as a team. I have also gained skills in time management since we must finish our GSL work, but I still have time to finish my schoolwork.

Zacchaeus Nigel G. Quincina

I learned so much with this process such as Teamwork, Responsibility and Time Management. I learned that to have a great group is to have great teamwork and cooperation because without those your group will not go ahead. I also became more responsible mostly to my group mates and advisers. I even learned to separate school time and me time.

Juliane Lindsay P. Pablo

I have learned enough, by having effective Communication that has developed me to have a better understanding and beliefs but also having a creativity throughout the day itself and a better opinion that the team and I made to get the project done as soon as possible.
